Yes I did thank you very much.

I have spoken with the operator of the sludge landfill and he says he was aware of the problem and has been in discussions with the concomm and the city and they have installed a series of check dams that are working well.

Hi Stephanie,

Did you receive this okay?

Thanks for your assistance.

Hello Stephanie,

It was nice chatting earlier today.

Attached are two identical GIS Maps showing the Gardner Sludge Landfill and the Rousseau Property with the three ponds showing and the extensive wetlands. GIS MAP was obtained from City of Gardner engineering website.

Circle in **red** is the approximate area of the discharge pipe into the wetland area.

I have attached a photo of the discharge pipe into the wetland and as you can see, it is pretty much filled with silt and debris. Who know what else is discharging from the "sewage sludge".

Anything else I can help with, please let me know.

Can we do water and soil sampling?

I would be happy to meet any EPA Official that is sent out to view the complaint.

Best Regards,
Paul DeMeo

Hi Stephanie,

Route 68 Gardner behind Wildwood Cemetery and the Gardner Transfer Station.

Rousseau Pond being endangered with Sewage Sludge Landfill in the back.

This feeds into Otter River, then Miller's River and onto Connecticut River.

I do not believe this is covered in Gardner's MS-4 storm water discharge permit.

How else can I help?

Mr. Alan Rousseau has been copied on this e-mail as he is the landowner directly affected.

Thanks!

Hello Mr. Demeo. I received the tip regarding the alleged wetlands violation by the landfill. I was wondering if you could provide me a bit more detail on the exact location so I can properly follow up on this? Thank you
